EVERY SINGLE DAY

# 37%

of staff **never suggest an add-on**. The ones that do are inconsistent.

**$6K**

lost monthly per merchant from missed upsells

**78%**

AI upsell rate vs 45% for humans

**0**

apps on Clover that do this. Out of 283.

# Toast built this for their merchants.
# Clover's 700,000 have nothing.

### Toast IQ

AI menu upsells at POS

Guest history on handhelds

AI-driven marketing

Restaurants only. Locked ecosystem.

### Clover App Market

Loyalty (points, punch cards)

CRM (customer data storage)

BI dashboards (historical reports)

No AI. No real-time. No upselling.

### The gap

**Real-time AI recommendations at the moment of sale.**

Cross-vertical. 700K+ merchants. First mover window: 12-24 months.

# Nudge

AI upsell assistant that lives on your Clover POS.
No training. No new hardware. One tap.

1

**Detect**

Item added to order

2

**Suggest**

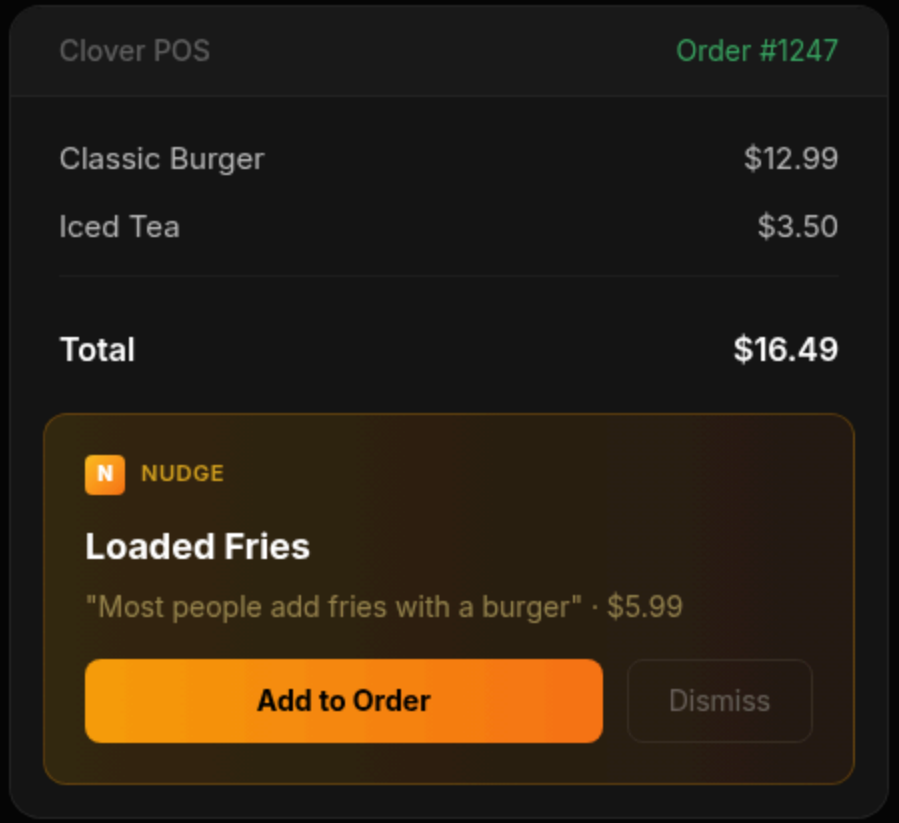
AI picks the right add-on

→

3

**Add**

One tap, on the receipt



# What the cashier sees

A non-intrusive card slides in with the item, price, and a conversational reason to offer it. One tap adds it to the order.

- Suggestions from the merchant's actual inventory
- Never suggests items already in the order
- Conversational phrase staff can say out loud
- Large tap targets for busy, wet hands
- Auto-dismisses after 15 seconds

# Native Clover. Real AI. Under 2 seconds.

**ON DEVICE**

**InventoryConnector**
Loads full menu, caches locally

**OrderConnector**
Listens for every item addition

**SuggestionCardView**
Animated overlay, one-tap add

**StatsManager**
Tracks acceptance rate + revenue
